SPRING $\frac{\text{DUCK}}{\text{FOOD}}$ PLANTING

RESULTS NEXT FALL

By planting the seeds, roots and tubers of several kinds of Natural Wild Duck Foods this Spring you can enjoy good Duck Shooting next FALL.

Once a growth of these natural Wild Duck Foods is established, it will be permanent, reproducing year after year.

Man drinking water out of thimble would be slow way to quench one's thirst.

It's equally as slow for a WILD DUCK to satisfy his hunger on a lake that has one kind of food and that perhaps in limited quantities.

A variety of good Duck Foods will make the Most Attractive Feeding Ground.

WHAT TO PLANT AND WHERE TO PLANT IT

In Fresh Water Rivers, Sloughs, Ponds or Lakes, These many kinds will grow:

Wild Millet Wild Millet
Burreed
Pickerel Plant
Water Smartweed
Three Square Rush
Cattail Sweet Flag Water Shield
Deep Water Potato
Muskgrass
White Waterlily

Nodding Smartweed Wapato Duck Potato Bulrush Bulrush Frogbit Wampee Duck Corn Cord Grass Wild Celery Sago Pondweed Wild Rice American Lotus

For Acid Waters, these are best:

Wapato Duck Potato Pickerel Plant Water Smartweed Cattail Sweet Flag Water Shield American Lo

Nodding Smartweed Bulrush Frogbit Wampee Duck Corn Cord Grass Deep Water Potato White Waterlily

MORE FOOD — MORE DUCKS BETTER SHOOTING

You don't need a sign to tell the Wild Ducks where to find food. BUT, you do need Duck Foods growing if you want Good Shooting. Here are several of the best duck coaxers for planting NOW. Several kinds will produce a variety of foods, thus entice more wild ducks and they will stay for a longer visit. Mail your order at once. We will acknowledge same and send complete planting instructions.

For Brackish Waters, Plant These:

Pickerel Plants Salicornia Muskgrass Sago Pondweed Widgeon Grass

Three Square Rush Wild Celery

All of these except Wild Celery do well in waters strong of alkaline.

Places subject to Flood Water will grow these:

Wild Millet
Burreed
Pickerel Plants
Water Smartweed
Three Square Rush
Cord Grass
Sago Pondweed
Muskgrass

Nodding Smartweed Wapato Duck Potato Bulrush Wampee Duck Corn Cattail Wild Celery Deep Water Duck Potato American Lotus

WATCH THIS YOUNGER GENERATION

In Sandy Soils, plant these:

Nodding Smartweed Wapato Duck Potato Bulrush Bulrush
Three Square Rush
Cord Grass
Sago Pondweed
Muskgrass Salicornia

Burreed Pickerel Plant Water Smartweed Cattail Wild Celery Deep Water Potato Widgeon Grass White Waterlily

Semi-Shaded Places will grow these:

Nodding Smartweed Wapato Duck Potato Frogbit Water Smartweed Cattail Sago Pondweed

American Lotus Pickerel Plant Wampee Duck Corn Water Shield Deep Water Potato White Waterlily

A Mud Soil Will Grow All of These:

Wild Millet Wild Millet
Duckwheat
Wapato Duck Potato
Water Smartweed
Cattail
Sweet Flag
Wild Celery
Deep Water Potato
Wild Rice
Saliconnia Salicornia White Waterlil**y**

Nodding Smartweed Burreed Pickerel Plant Frogbit Wampee Duck Corn Cord Grass Sago Pondweed Water Shield Muskgrass Widgeon Grass American Lotus Nodding Smartweed

CANVAS-BACK

CANADA GOOSE

They illustrate why naturalists are continually amazed at the number of ingenious ways in which Nature helps her children solve the problem of food.

Migratory waterfowl also have that which we might term as a telescopic vision, very keen. While winging their way over a body of water they can observe the kinds of food which grow beneath the water's surface.

Where they find a variety of the foods they like to eat, large numbers will stop and they will stay as long as the food supply will last or the season will permit.

WILSON SNIPE

HELP NATURE

Nature is slow in her process of distribution of aquatic seeds. It sometimes takes years upon years for Nature to spread the seeds of Natural WILD DUCK FOODS over a large area and from lake to lake. Seeds must drift with the current, birds must carry undigested seeds OR perhaps one may stick to the feet of some species of waterfowl and thus be conveyed to another lake or pond.

Fortunately these seeds can be purchased and planted by man,

often accomplishing in ONE YEAR that which may take Nature a hundred years to do.

GOOD Feeding Grounds for our supply of wild ducks are inadequate to provide for the supply of birds. They migrate thousands of miles in search of food, even into the most remote places. It's no trick to coax the wild ducks to your Favorite Shooting Place-simply plant a variety of the kinds of food they like and will continually search for.

GAME FOOD NURSERIES, P.O. Box 371, Oshkosh, Wisconsin

When Shooting at Wild Ducks Dropping to Decoys, Gun Must be Held Well Under.

But, you can't shoot them if the birds aren't there, and—they won't be there, unless there is something for them to eat. Wild ducks can't live on just water.
